

### Maintenance Absorbents

Maintenance industrial absorbents are used to clean oil spills (oil and its derivatives) and chemicals, which can produce pollution in the water or on the ground.

We offer a range of absorbents for maintenance, able to absorb any liquid, such as emulsions, liquid cooling and protection of transit areas.

### FEATURES

- They keep work areas cleaned and safe.
  - Prevent spillage accidents.
  - Easy and fast control of the spill.
  - Control on transit areas.
  - Comply with the 14001 ISO Standard (waste).
- Controls spills to rivers, sea, sewer, etc..
  - Controls spillage of any type of liquids.
  - Provide safety and cleanliness.
  - Variety of formats: sheets, rolls, tubular barriers, particulate or vegetable particles, pillows, barriers with curtain, bands.
